Amreli, Gujarat, India

[LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Professional Summary

Laravel Developer with experience building RESTful APIs, authentication systems, and full-stack web applications using PHP, Laravel, MySQL, and AJAX. Passionate about clean MVC architecture and backend performance. Seeking an entry-level role to contribute to production-grade product development.

Technical Skills

Backend: PHP, Laravel (REST API Development, Authentication, Middleware)

Frontend: HTML5, CSS3, JavaScript, jQuery, AJAX

Database: MySQL (Database Design, Query Optimization)

Tools & Technologies: Git, GitHub, Postman, Docker (Basics)

Concepts: Object-Oriented Programming (OOP), MVC Architecture, RESTful Services

Experience

Jr. Laravel Developer

November 2025 – Present

[Ashtavinayak Soft Solution](#), Amreli.

- Designed and deployed 10+ RESTful APIs for authentication, CRUD, and core backend services.
- Optimized MySQL queries resulting in up to 20% performance improvement.
- Implemented AJAX-driven features that eliminated unnecessary page reloads across key user flows.
- Collaborated on 3 production web applications built on Laravel's MVC architecture

Projects

1. E-Grocery Web Application (Laravel, MySQL, AJAX)

Mar 2026 – Present

- Developed a full-stack e-commerce platform handling 50+ products and complete order workflow
- Built features including user authentication, product browsing, cart system, and checkout process
- Designed admin dashboard managing products, categories, inventory, and orders
- Integrated AJAX for smooth and dynamic user interactions across multiple modules
- [GitHub: E-Grocery-Web-Application](#)

2. Eventify – Wedding Management System (Core PHP, MySQL)

Jul 2025 – Sep 2025

- Built a role-based web application managing 30+ event bookings and user records
- Developed admin panel to manage events, users, and booking workflows efficiently
- Implemented REST-like APIs with AJAX for real-time updates and better UX
- Structured application using MVC-based architecture for scalability and maintainability
- [GitHub: Eventify -Wedding Management System](#)

Education

Bachelor of Computer Applications (BCA)

2023 – 2026

Saurashtra University, Gujarat

Percentage: 81%

Certifications

- Internship Certificate in Laravel Development – Ashtavinayak Soft Solution
- Internship Certificate in Web Development – Cognifyz Technologies

Currently Learning / Exploring

- React.js for building dynamic and component-based frontend interfaces.
- PostgreSQL for advanced relational database management beyond MySQL
